

Sheet 5 Industrial town

This image is Public Domain

The picture above shows a town in a valley. There are numerous buildings constructed of either brick or stone with tiled roofs, as well as large factory buildings with chimneys. Outside the town in the foreground are fields and trees. The town is served by a railway (not visible).

What are the items in the picture made of? Where might that have come from and what effect would getting them have had on the area?

What would the people who lived here have eaten? How would they have got it and what effect would that have had on the area?

How would the people that lived here travel? And what effects would that have on the area?
