## 1 – Introduction

This document is a guide to using **Reporting Services** on MyView.

### 1.1 – What is Reporting Services on MyView?

Reporting Services allows Managers to view real-time HR and Payroll information for employees in their reporting structure. Employees also have access to Reporting Services but will only see information relating to themselves.

This information can be accessed via MyView widgets that are fully integrated with the MyView Dashboard and presented in a format most suitable to summarise the data. MyView users can 'drag and drop' their most useful widgets onto their Dashboard and by clicking on the widgets will be able to view the underlying data.

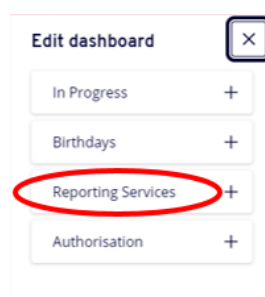

## 2 – How to add Reporting Services widgets to MyView Dashboard

To add a Reporting Services widget to your MyView Dashboard

Click onto 'Edit Dashboard' on the top right hand-side

Select the 'Reporting Services' option.

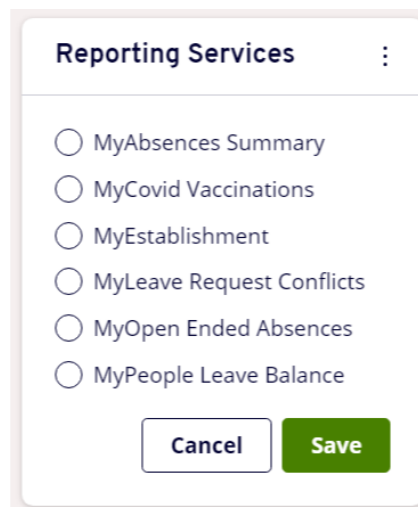

This will place the widget onto your MyView dashboard and ensure it will appear each time you are in MyView.

### 3 – Enabling a Reporting Service Widget

To enable a Reporting Services Widget, click the three 'dots' and select the relevant widget to be displayed by selecting settings and the relevant option, select save to add the widget to the dashboard:

## 4 – Saving and Exporting data from Reporting Services

Reports can be saved or exported to PDF/Excel. Once a report is opened, locate the 'export' icon:

**Please note** that once exported the data displayed is 'as at' the time stamp as highlighted below:

Users can click on the **refresh icon** to refresh report with latest data if required

When you have selected to export, you will be presented with all available export options – including PDF and Excel formats.

Select the relevant format and you will be presented with the option to 'Open' or 'Save'

The report will then be exported to save to your device

Additional columns visible on the right include: POST FUNDING EXPIRY DATE, POST VACANT FTE STATUS, and a search report field.

## 5 – Reporting Services Widget

The following section provides an overview of each Reporting widget. Additional widgets will be added overtime to meet the management information needs of employees and managers.

### 5.1 MyAbsences Summary

This report allows managers to view **real-time** absence data either by team, by location, or by establishment.

The information contained in these reports is based on all current post holdings that report up to (and including) the manager. The absence data is calculated based on current employees who are recorded as absent (sickness, annual leave, compassionate leave).

To open the detailed report, you can click on one of the following options:

- **By Team** – this will provide you with a summary of current absences broken down by absence reason down to team level.
- **By Location** – this will provide you with a summary of current absences broken down by absence reason down to team level but split further by location.
- **By Establishment** – this will provide you with a summary of absence rates based on current absences – split by absence reason/group.

You can view the underlying data by clicking on any number in the summary report. Please refer to s6 on exporting and refreshing the data.

**The accurate recording of an employees' status in MyView is extremely important so that we can have accurate and consistent information for monitoring and reporting.**

You will receive regular reminders to check that ongoing employees' absences are up to date and accurate in line with the above guidance on absence recording.

### 5.2 MyEstablishment

The MyEstablishment report allows managers to view real-time Establishment data including employee names, post titles, projected end-dates, organisation hierarchy information, post holding location and much more.

The initial widget summarises the number of posts within your team, total FTE posts, and the number of vacant posts.

To open the detailed report, you can click on the number against 'Posts' or 'Vacant.'

Throughout the report, any fields marked blue (as below) can be selected to expand on the data available (additional data available will be dependent on your role within the organisation).

### 5.3 MyPeople Leave Balance

This reporting tool will allow managers to view the detailed leave information in real-time for your team members, including leave balances, days taken, carry forward leave, and purchased leave. This reporting analytic can be particularly helpful in ensuring employees are managing their annual leave. The analytic should also be reviewed in advance of the end of the leave year (March) to ensure employees have used their balance prior to the start of the leave year in April.

Please note that this analytic **does not** include leave balances for employees who do not use MyView to book leave.

To open the detailed report, you can click on the number against 'Post Holdings'

### 5.4 MyLeave Request Conflicts

This reporting tool will display any conflicting leave requests within your team in real-time. You will be alerted if a member of your team submits a leave request for a date on which other members of your team already have approved/submitted leave requests.

This analytic should be used to assist your decision making when approving annual leave requests. The report will help determine if there is sufficient team cover prior to approving a team member's leave.

To open details of the conflicting requests, you should click the conflict number. The left-sided report displays details of the new request which has caused a conflict, whereas the right-sided report shows details of the other leave contributing to a conflict of dates.

From the information displayed, the manager would see that approval of the new leave request would result in four team members being absent on 01/05/2020. This will assist with the manager’s decision-making process.

### 5.5 MyOpen Ended Absences

This reporting tool informs managers which employees in their reporting structure are currently recorded as being on open-ended sickness absence. The analytic acts as a reminder for managers to review open-ended absence, and end sickness accordingly when the employee returns to work. This allows for accurate sickness absence reporting and sickness entitlement.

To open details of the open-ended absences, you should click the number. The report will then open:

### 5.6 My Covid Vaccinations

This reporting tool informs managers which employees in their reporting structure are currently recorded as receiving the first, second and booster dose of their COVID19 vaccination.

The initial widget summarises the number of employees within your team, followed by a summary of employees with a first vaccination recorded, the number of second vaccinations recorded and the number of booster vaccinations recorded also.

To open the details of vaccinations, click on the number within the three options available, selecting the number of employees will present a report of everyone within the team displaying who has had a vaccination recorded.

Selecting the number of first vaccinations will only display those who have a vaccination recorded, alike to selecting the second vaccination number or booster vaccination number.

Once selecting you will be presented with the following data:

*(Data has been removed from the below screenshot for Data Protection)*

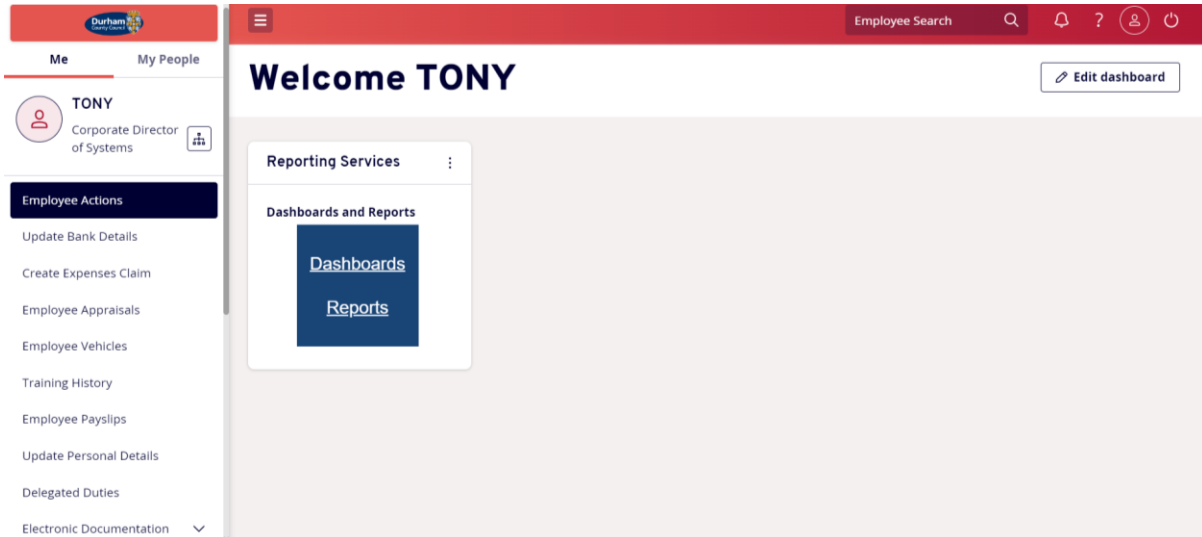

| EMPLOYEE NUMBER | SURNAME | FORENAME | TITLE | POST NUMBER | POST TITLE                            | FIRST VACCINATION DATE | SECOND VACCINATION DATE | BOOSTER VACCINATION DATE |
