

**Thomas Thornthwaite****D-Day Landing Craft**

We went on to this landing craft, it was about 50, and you went down below and it was 16 feet by 20. And it had rolled down canvas things, bed affair and with just our nose above the one above. And we were all stuck in there. And I didn't like the idea of it at all being hemmed into this thing. And on the deck there was two jib things with a ramp which let down when we actually landed and you went off there.
